

# MAT 119 Calculus of a Single Variable Part I

**Instructor:** Professor Scott Jordan

**Email:** sjordan@cornellcollege.edu

**Office:** West Science 310

**Office Hours:** By appointment.

**Text:** *Calculus from Graphical, Numerical, and Symbolic Points of View (2<sup>nd</sup> edition)* by Ostebee and Zorn

**Class Meeting Times:** There will be Lecture/Discussion each morning from 9 a.m. until around 11 a.m. and afternoon class Monday through Friday from 1 p.m. until 3 p.m.

**Prerequisite(s):** The prerequisite for MAT 119 is three and one-half years of high school mathematics, including trigonometry.

**Course Description from the Cornell Catalog:** Differential and integral calculus of functions of one real variable and analytic geometry of two variables. This course emphasizes review of pre-calculus material and is appropriate for students who feel they need more time in order to succeed in calculus.

## **Course Objectives:**

Upon completion of MAT 119 a successful student will be able to

- Demonstrate skills in algebra and knowledge of pre-calculus concepts including familiarity with standard families of functions
- Evaluate a variety of limits including limits at infinity, one-sided limits, and limits of indeterminate forms and identify discontinuities in functions presented algebraically or graphically
- Apply the definition of derivative to calculate and estimate derivatives from formulas, graphs, or data
- Differentiate sums, product and quotients of composite polynomial, trigonometric, exponential, and logarithmic functions
- Discuss the conceptual relations between derivatives, rates of change, and tangent lines in the context of an applied example
- Solve applied problems using calculus and justify answers

This course supports the Educational Priorities and Outcomes of Cornell College with emphasis on knowledge, inquiry, reasoning, and communication.

## **How to be successful in MAT 119:**

Accept responsibility for your own learning.

Be prepared for class - read the text before class.

Complete assignments on time.

Don't get behind. Complete assignments as soon as possible. Seek help as soon as you realize you need it.

**Homework:**

Homework is critical to your understanding of this course. The assignments are to help you prepare for the quizzes and exams. Make sure that your homework is worth grading. Failure to follow the following homework submission format will result in the loss of points and may result in refusal of the submission entirely. Homework will be graded based on accuracy of several problems and overall completion of the problems. Homework should follow the format described in the PDF file Homework\_format.pdf found in Moodle. Failure to follow this format will result in the loss of points.

**Homework Policies:**

1. Homework needs to be stapled together in the top left corner. Your name needs to be at the top right corner. If this is not followed, you will receive a 0 on your homework packet.
2. The homework problems and sections need to be in order. Failure to do this will result in the loss of points.
3. No frillies from spiral bound notebooks will be allowed. If there are, the homework will receive a zero.
4. Any homework pages that are not in the packet when turned in will not receive any points. This means that it is your responsibility to ensure that your homework contains all the required problems.
5. Homework problems are not to be put side by side in your work. All homework problems should go in order vertically. That means if I draw a horizontal line across the paper it should only cross one problem. Failure to do this will result in a zero.
6. No late homework will be accepted.

**Quizzes:**

Quizzes will be taken in class. It will contain questions that pertain to any material previously covered.

**Exams:**

There will be two exams and a cumulative final taken in class. Calculators, headphones, and other electronic devices are not allowed during exams.

**Attendance:** Attendance for this class is mandatory. If you have to miss class do to some school sponsored event, please let me know ahead of time. Failure to come to class will result in the loss of points. Each class meeting will be worth one point. That means that most days you can get up to 2 points in attendance.

**Grade Distribution:**

Attendance	5%
Homework	20%
Quizzes	25%
Exams	30%
Final	20%

**Letter Grade Distribution:**

Range	Letter	Range	Letter
$\geq 93.00$	A	73.00 - 76.99	C
90.00 - 92.99	A-	70.00 - 72.99	C-
87.00 - 89.99	B+	67.00 - 69.99	D+
83.00 - 86.99	B	63.00 - 66.99	D
80.00 - 82.99	B-	60.00 - 62.99	D-
77.00 - 79.99	C+	$\leq 59.99$	F

I reserve the right to adjust this grade distribution as needed.

**Course Policies:**

- **Changes in the syllabus**

I reserve the right to make changes to any part of this syllabus. Changes will be announced in class and through class wide email. If changes are made, a revised syllabus will be posted in Moodle.

- **Textbook**

There will be times during the day when we will work from the textbook. You are required to bring it to class every day.

- **Communication and availability**

I am available most of the day. I leave my office sometime between 4-5 pm. I may be available to answer emails between 9-10 pm. If you email me after that time, don't expect a response till the next day.

- **Distractions**

Other than our classroom computer, no electronic devices may be used in our classroom while class is in session. Exceptions will be made in special cases, for example if these are used in an accommodation for a disability.

- **Drop**

I follow the college's policy on 15th day drops; i.e. in order to be eligible for a third Friday drop, you must attend class and complete all course work.

- **Academic Integrity**

Cornell College expects all members of the Cornell community to act with academic integrity. An important aspect of academic integrity is respecting the work of others. A student is expected to explicitly acknowledge ideas, claims, observations, or data of others, unless generally known. When a piece of work is submitted for credit, a student is asserting that the submission is her or his work

unless there is a citation of a specific source. If there is no appropriate acknowledgement of sources, whether intended or not, this may constitute a violation of the College's requirement for honesty in academic work and may be treated as a case of academic dishonesty. The procedures regarding how the College deals with cases of academic dishonesty appear in The Catalogue, under the heading "Academic Honesty."

- **Accommodations**

Cornell College makes reasonable accommodations for persons with disabilities. Students should notify the Coordinator of Academic Support and Advising and their course instructor of any disability related accommodations within the first three days of the term for which the accommodations are required, due to the fast pace of the block format. For more information on the documentation required to establish the need for accommodations and the process of requesting the accommodations, see

<http://www.cornellcollege.edu/academic-support-and-advising/disabilities/index.shtml>.
