

Food for Thought

How does machine learning affect the progress of certain industries?

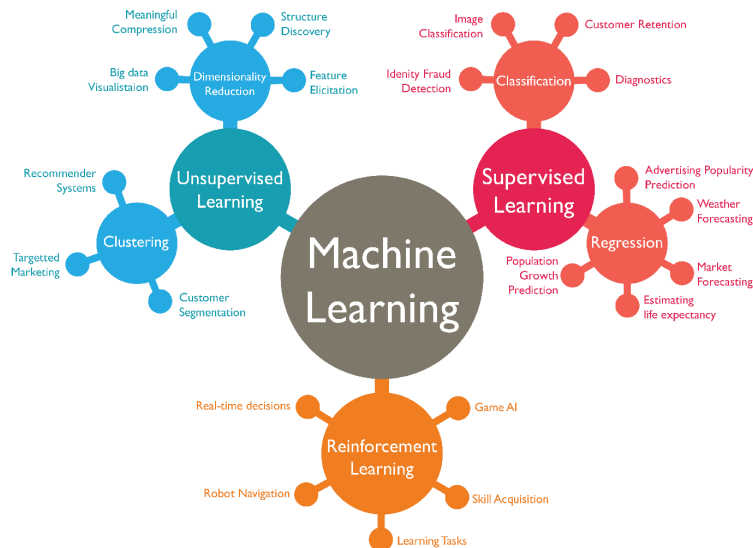

What kinds of research are currently being done in the field of machine learning?

How could a person who is relatively new to the field become more involved?

What is the relationship between big data, artificial intelligence, and machine learning?

Companies and How They Use ML

- [Global Fishing Watch](#): The company offers real-time tracking of global commercial fishing activity and helps identify when fishing was happening illegally.
- [RADAR \(Reporters and Data and Robots\)](#): Robot Writers use a text algorithm to generate news content. It gathers data from the government and public/private companies.
- [John Deere and Blue River Technology](#): Uses AI and computer vision to precisely spray herbicides only where it's needed.
- [Chef Watson](#): It is an application that helps individuals develop recipes and suggest food combinations.

Share of People Who Agree They Trust AI (2018):
